○ In 2010, the mean age of householders for the nation is estimated to be 48.8 years. In 2035, the mean age of householders is projected to be 57.0 years for Gwangju, 57.7 years for Daejeon, 58.8 years for Gyeonggi and 59.8 years for Seoul. For the nation excluding these four metropolitan cities and province, the mean age of householders is projected to surpass 60 years in 2035.

In 2035, the share of one-person households for all the metropolitan cities and provinces is projected to be higher than that of 'couple with children' households.

- As for the household type for the nation, in 2010 'couple with children' households are estimated to occupy the largest share, which is followed by 'one-person' households and 'couple' households. From 2010, the share of one-person households in Jeonnam is expected to be higher than that of 'couple with children' households. From 2011, the share of one-person households in Gangwon and Gyeongbuk is expected to be higher than that of 'couple with children' households. From 2012, the share of one-person households in Chungnam is projected to be higher than that of 'couple with children' households. From 2013, the share of one-person households in Chungbuk and Jeonbuk is projected to be higher than that of 'couple with children' households. In 2035, for all the metropolitan cities and provinces, one-person households are projected to occupy the largest share.
- As for the number of household members for the nation, in 2010, two-person households are estimated to occupy the largest share, which is followed by one-person households, four-person households and three-person households. In 2035, for all the metropolitan cities and provinces excluding 6 metropolitan cities and provinces (including Seoul), one-person households are estimated to occupy the largest share, which is followed by two-person households, three-person households and four-person households.
- In 2010, the average number of household members for the nation was 2.71 persons. In 2035, the average number of household members in Jeonnam, Gyeongbuk, Gangwon, Chungbuk and Chungnam is projected to record 1.88 persons, 1.89 persons, 1.95 persons, 1.96 persons and 1.96 persons, respectively. The average number of household members for these five provinces is expected to record less than 2 persons.
