< Marriages with foreign spouses (2013-2023) >

< Divorces with foreign spouses (2013-2023) >

**Purpose**

- Marriage and divorce influence the change in the size and structure of population. Statistics of marriage and divorce are produced to be used as basic data when making policies.

 **Basic data**

- Reports of marriage and divorce are submitted to administrative district offices of Si (& Gu) or Eup (& Myeon) between January 1st and December 31st, 2023, according to the Statistics Act and the Act on Registration of Family Relations. These reports are used as basic data when producing statistics of marriage and divorce.

 **Legal basis**

- Designated statistics approved according to Article 17 of the Statistics Act (Approval No. 101003, Vital Statistics)

 **Statistical terms**

- Crude Marriage Rate (CMR)  
:The crude marriage rate indicates the ratio of the number of marriages in a specific year to the mid-year population in that year. It is expressed as marriages per 1,000 population.
- General Marriage Rate (GMR)  
:The general marriage rate indicates the ratio of the number of marriages in a specific year to the mid-year population aged 15 or more in that year. It is expressed as marriages per 1,000 population.
- Age-specific Marriage Rate (ASMR)  
:The age-specific marriage rate indicates the ratio of the number of marriages of a specific age group in a specific year to the mid-year male or female population in the age group in that year. It is expressed as marriages per 1,000 population of the specific age group.
- Crude Divorce Rate (CDR)  
:The crude divorce rate indicates the ratio of the number of divorces in a specific year to the mid-year population in that year. It is expressed as divorces per 1,000 population.

○ General Divorce Rate (GDR)

:The general divorce rate indicates the ratio of the number of divorces in a specific year to the mid-year population aged 15 or more in that year. It is expressed as divorces per 1,000 population.

○ Age-specific Divorce Rate (ASDR)

:The age-specific divorce rate indicates the ratio of the number of divorces of a specific age group in a specific year to the mid-year male or female population in the age group in that year. It is expressed as divorces per 1,000 population of the specific age group.

○ Divorce Rate of Married Persons

:The divorce rate of married persons indicates the ratio of the number of divorces in a specific year to the mid-year married population\*\* aged 15 or more in that year. It is expressed as divorces per 1,000 population.

\* When calculating all marriage and divorce rates, the estimated population prior to 1992 and the resident registration population after 1993 (After 2010, residents whose residence is unidentified are excluded) are used.

\*\* The mid-year married population is estimated by applying the share of married persons of Household Projections (as of 2020) to the mid-year resident registration population.
